

Summer II 2015

PSY 101.01 (2099)

If this report is blank, please return to the Basic Report, select a course, and follow the green arrow to connect to the written comments.

Please comment on the course dynamics. I was honestly expecting more homework for this class, but I'm not complaining. I really like the supplemental reading about the studies that related to what we were learning.

The textbook readings were pretty long, but I understand that as it was a summer course and we needed to fit in as much information as we could in a limited time frame.

Please comment on your overall course appraisal. I really just dislike intro courses, but Beatrice made it a pretty decent class. Still hate psychology though.

It was extremely organized, there were no surprises and the material and format of the class was easy to follow. It was definitely challenging, but I learned a lot and am overall happy I took this class. I liked how in the lectures it was not only notes, but interactive discussions and videos as well.

Personally, I like how small the class was. It was less intimidating for me to ask questions, and discussions about the topics were facilitated more easily.

The course covers some really interesting information.

Please provide constructive comments or add to any or all of the above (quality of instructor). She was very enthusiastic about the topics (especially social psychology, which was her field of study), and it rubbed off on me. When we had questions that she couldn't answer, she would research them out of class and get back to us about what she learned.

Very knowledgeable about the subject and was passionate about the subject so it made me more interested. Also, very willing to meet with with students when help was needed.

Please provide constructive comments or add to any or all of the above (self-evaluat.. I took this so that I could learn material for the MCAT
